Filtered Water

Soft Water

***Better water. Better taste.
Better health!***

Ever wondered why everyone is drinking bottled water now days?

Consumers Reports magazine revealed recently Americans spent thirty-one billion dollars on bottled water last year, and now bottled water outsells all brands of soft drinks, combined.

What does this say about the quality of our tap water?

PRIMARY WATER QUALITY PROBLEMS

- Lead, Mercury and other heavy metals
- Harmful chemicals (such as VOCs & PFOS)
- Trihalomethanes (linked to cancer)
- Water hardness
- Too much Chlorine
- Foul tastes and odors
- Iron, Sulfur and Manganese
- Nitrates from fertilizers
- Bacteria, Cysts & Viruses
- Arsenic, Tannin, Sediment
- Low pH (Acidic water)

Hard Water Problems

Hard water map

Hard water areas of the United States are shown above. (Hard levels are shaded in red and brown; moderate levels of hardness are shaded in green.)

Hard water creates havoc in the home, and creates two primary problems, described below:

Soap Residue

Soap, detergents and shampoo do not fully dissolve in hard and moderate levels of water hardness. This undissolved soap leaves a residue on shower doors, your skin and in your hair.

Hard Water Scale

Hard water scale forms in your pipes and on water related appliances. This scale may damage your water heater, washing machine, dish washer, coffee maker and other water appliances.

Enjoy soft, filtered water from every faucet in your home with Safety Zone “Combo” systems!

Feel “squeaky clean” with soft water!

Ideal for city water!

Our combination whole house filter and water softener systems are designed for city water to provide soft, filtered water throughout your entire home.

Two-Tank combination whole house filtration system and water softener.

SIZING CHART

Model	Tank Size	Sizing
COMBO-2-100	10" x 44"	Average water use
COMBO-2-150	10" x 54"	Higher water use
COMBO-2-300	14" x 65"	Very high water use

No “bad hair days” when you switch to Soft water!

Don't wait any longer. Enjoy soft water today!

Better taste and better health with whole house water filtration.

“All-In-One” combination whole house water filter and water softener.

Removes / Reduces:

- Harmful chemicals
- VOCs
- Chlorine tastes & odors
- Chloramines
- Heavy metals
- Water hardness

SIZING CHART

Model	Tank Size	Sizing
COMBO-1-150	10" x 54"	Average water use
COMBO-1-200	12" x 52"	Higher water use
COMBO-1-300	14" x 65"	Very high water use

Whole House Water Filters for City Water

Do you drink bottled water because you suspect your tap water is unsafe?

Remove harmful chemicals, Chlorine, Chloramines, tastes and odors with our highly affordable, non-electric whole house filters.

Non-Electric - No drain required!

Removes / Reduces:

- Harmful chemicals
- VOCs
- Chlorine & Chloramines
- Tastes & odors
- Heavy Metals

“Enjoy high quality water from every faucet”

SIZING CHART

Model	Tank Size	Sizing
WHF-100-NE	10" x 54"	Average sized homes
WHF-150-NE	12" x 52"	Larger homes
WHF-300-NE	14" x 65"	Estate homes

Water Softeners for City and Well Water

Feel the difference when you bathe in soft water!

Enjoy brighter laundry with soft, conditioner water.

Benefits:

- Soap works better in soft water!
- No more “bad hair days”
- Softer skin
- Brighter laundry
- No mineral deposits
- No Calcium scale
- Fewer plumbing repairs

SIZING CHART

Model	Tank Size	Sizing
WC-100	10" x 44"	Average sized homes
WC-150	10" x 54"	Larger homes
WC-300	14" x 65"	Estate homes

Well Water System

For Iron, Sulfur & Manganese

No Iron Stains

No Sulfur Odors

Chemical-Free treatment for Iron, Sulfur and Manganese with our unique “air-draw valve”.

Our Iron, Hydrogen Sulfide and Manganese filters work without the use of chemicals because we use air for oxidation with our unique “air draw” valve, making this troublesome trio more filterable. Operation is totally automatic.

MODEL

Model	Tank Size	Type
ISF-150-AD	10” x 54”	Residential applications

Note: If bacteria are present, chemical treatment is required. Contact our distributor for more details.

Acid Neutralizer

Prevents corrosion from Acidic water!

Corrosion like this can put pin holes in your copper pipes and leach lead from plumbing fixtures into your water.

Our Acid Neutralizers are designed for well water when pH is 6 or below to prevent corrosion.

Safety Zone Acid Neutralizers come with a dome-hole tank for easy media replenishment.

Dome Hole Tank

MODEL

Model	Type
AN-150-DH	Acid Neutralizer; 10" x 54" tank

Looking for an alternative to a conventional water softener?

If so check out our two-tank SALT-FREE system!

Tank #1

Whole house filtration is provided in tank #1 to remove, harmful chemicals, Chlorine, taste, odors and sediment.

Tank #2

This tank conditions your water to prevent scale formation and reduces heavy metals.

Salt-Free water conditioner and whole house filter!

If you get your water from a municipal water supply and want a SALT-FREE system, this option may be for you! Call for a free, no obligation water analysis today!

MODEL

Model	Type
SZ-SFWCF-2-100	Two-tank model for city water

Drinking Water Filters

With Reverse Osmosis Technology

Quick Change Cartridges and Membrane

Removes / Reduces

- Harmful chemicals
- VOCs & PFOS
- Trihalomethanes
- Bacteria
- Cysts
- Viruses
- Lead, other heavy metals
- Nitrates
- Fluoride
- Sodium
- Pharmaceuticals
- And more!

Our reverse osmosis drinking water systems come with a dedicated faucet, installed by your kitchen sink, so you may enjoy high quality water when needed.

MODELS

Model	Type
SZ-RO-4	Deluxe model for city or well water
SZ-RO-4-P	Deluxe model with non-electric pump*

*For well water with low pressure (below 40 psi).

UV Purifier Disinfection without chemicals!

Kills bacteria, cysts, viruses and other harmful microorganisms with ultraviolet light.

Features:

- Highly effective
- Rated for flow rates up to 15 GPM
- Stainless steel chamber
- Counts days to indicate when lamp replacement is necessary (with alarm)
- No chemicals needed!
- For well water or municipal water without a proper chlorine residual

MODEL

Model	Voltage	Design Flow Rate
SZ-UV-12	110 Volts	12 GPM

Bottle-Less Water Dispensers For Home or Office

No bottles!

Dispenses hot and cold water. Comes with or without three stage filtration.

Optional three-stage filtration removes:

- Bacteria
- Cysts
- Viruses
- Sediment
- Chlorine
- Taste
- Odors
- VOCs and other Harmful chemicals

Note: Tanks are stainless steel.

Advantages:

- Dispenses hot and cold water
- No bottles
- No lifting heavy water bottles
- No bottle storage
- No monthly rental payments
- No payments for bottled water

MODEL

Model	Type
SZ-WD-B-3	Water dispenser; black; 3 stage filters
SZ-WD-B	Water dispenser; black; no filtration

Well Water Systems

When disinfection is needed.

The “Home Water Treatment Plant”

Chemical feed pump

Our chemical feed pumps are peristaltic “roller type” so they never lose their prime.

Hydrogen Peroxide

We prefer to use Hydrogen Peroxide for disinfection over Chlorine for multiple advantages. Peroxide works twice as fast as Chlorine; leaves no harmful by-products as with Chlorine and will not damage your plumbing.

MODEL

Model	Tank Size	Type
HWTP-150-B	10” x 54”	Home Water Treatment

Note: Base model includes chemical feed pump, contact tank, 15 gal. solution tank, 10x54 water softener and 10x54 carbon filter for chemical removal, post disinfection. Iron/Sulfur filter and neutralizer are optional.

Commercial Systems

Commercial water softeners and filters are available in a wide range of tank, valve, resin and filter media options. Please inquire!

Commercial water softener and brine tank.

Commercial filters

Commercial filters are available for city and well water applications.
